

NEW CONSOLIDATION DATE!

Greater New York's Independents Call Once More for Union.

THE OVERTHROW OF THE STATE RING A SIGN OF PUBLIC FEELING.

A NEW BILL FOR THE LEGISLATURE.

That there is a deep-rooted desire for the consolidation of Westchester, Queens, Kings and Richmond Counties with New York is known by every one who is in any way familiar with the subject. As discussed during the past year, the Legislature has been asked to take action on the consolidation of the five counties. The Legislature has ignored the trend of public opinion, and two bills have been relegated to oblivion by the politicians in Albany. But the gentlemen who comprise the commission appointed by Gov. Hill did not lose courage, and to-day they are more than ever sanguine of the consummation of their hopes.

The election last month went far towards bringing about the desired result, but much work has yet to be done before the Legislature meets in January. The political revolution has caused the retirement of men who opposed the last bill, and has brought to the front a number of men who are strongly in favor of the consolidation.

MR. GREEN'S NEW BILL. A new bill is now being prepared which the author, President Andrew H. Green, of the commission, believes will meet with general favor. At his home, No. 61 Park avenue, Mr. Green said yesterday that the prospect for the adoption of a consolidation act was never so hopeful as now.

"Before I express my opinions," he said, "I want to thank the World for its unceasing efforts to promote this grand object. We have all labored hard during the past few years to bring about the consolidation, and in the face of political obstructions, we have weathered stronger than ever before. The prospects were never so hopeful as now. The vast majority of the people of the five counties are in favor of consolidation. We have received many encouraging words from leading citizens, and The World has, by its canvass of the business men and property-holders, given me emphatic support to the movement."

"We have had an uphill struggle so far, but the darkness is being dispelled. The objections made by the Legislature in the last Legislature were most unreasonably and without any basis. The people of the five counties are now more united than ever before. The sentiment of feeling in Queens is in our favor. What do you contemplate in the way of a new bill?"

For the present I cannot answer that question, except to say that I have made rough draft of a bill embodying my views, and it will be presented to the commission this week for their consideration. The course to be pursued after that will in a measure be problem.

HOW COMMISSIONER DEVOE LOOKS AT THE FIGHT.

Commissioner Frederick W. Devoe said: "We can't fail to win this time. The people are in favor of consolidation, and especially the people of Brooklyn, who by their voice at the polls expressed their opinion. I know little about politics, but I do know that the new Legislature will be a more progressive one. Heretofore the commission has had to battle with men who ignored the people's wishes. Now the people are in the saddle, and the commission is satisfied with bringing about this much-needed reform, for such it really is."

FROM COMMISSIONER VAUX.

Calvert Vaux said: "My position on the consolidation is purely a technical one. I am simply a lawyer, and I know little about politics, but I do know that the new Legislature will be a more progressive one. Heretofore the commission has had to battle with men who ignored the people's wishes. Now the people are in the saddle, and the commission is satisfied with bringing about this much-needed reform, for such it really is."

MR. HAMILTON'S VIEWS.

John L. Hamilton said: "I have been away so much of late that I cannot say much about the consolidation. But I know that the people are in favor of it, and I believe that the new Legislature will be a more progressive one. Heretofore the commission has had to battle with men who ignored the people's wishes. Now the people are in the saddle, and the commission is satisfied with bringing about this much-needed reform, for such it really is."

FROM MR. STRANAHAN.

J. S. T. Stranahan, Brooklyn's first choice, when seen at his home at Union and Clinton streets, Brooklyn, said: "The consolidation of the five counties is a matter of course. It is a matter of course that the people are in favor of it, and I believe that the new Legislature will be a more progressive one. Heretofore the commission has had to battle with men who ignored the people's wishes. Now the people are in the saddle, and the commission is satisfied with bringing about this much-needed reform, for such it really is."

FROM MR. GRAVES.

Edward C. Graves, a New York lawyer, residing at No. 33 Halsey street, Brooklyn, said: "The consolidation of the five counties is a matter of course. It is a matter of course that the people are in favor of it, and I believe that the new Legislature will be a more progressive one. Heretofore the commission has had to battle with men who ignored the people's wishes. Now the people are in the saddle, and the commission is satisfied with bringing about this much-needed reform, for such it really is."

READY TO GO TO THE NEST.

The Marblehead, Incidentally, Makes Nineteen Knots an Hour.

SHE SEEMS A TRIM BOAT AND MAY EXCEED EXPECTATIONS.

THE TRIAL BOARD TO ARRIVE TO-DAY.

(Special to The World.) NEW LONDON, Dec. 3.—Snow an inch deep lay on the spar deck of the cruiser Marblehead when all hands turned out at daylight this morning. The ship, anchored off City Island, had a gale from the northeast was blowing, and the sea was running high.

The Marblehead, incidentally, makes nineteen knots an hour. She seems a trim boat and may exceed expectations.

The trial board to arrive to-day.

TO CLUB YOU WITH VELVET TOUCH.

A New-Fangled Weapon Now Under Consideration for the Police.

People at Police Headquarters yesterday were talking about the so-called "humane police club," which, according to rumor, is to be adopted in New York by the Police Commissioners. The club is composed of a core of hickory or stone, covered with rubber.

The weapons are the invention of Dr. A. W. Nelson, of Connecticut. It is claimed by him that a blow which would fracture a man's skull, if delivered with the velvet touch, would, if delivered with one of the new-fangled weapons, merely stun the recipient.

It is not that a blow of the club is caused by a blow with it. In fact, the club is not a club at all, but a weapon. It is a club, in the sense that it is a club, but it is not a club, in the sense that it is a club.
